# INTRODUCTION

---

## The COVID-19 crisis has exposed the gaping loopholes in our society.

40% of the US dollars currently in circulation were printed between 2020 and 2021. The European Union has also circulated several trillion euros during this time. This unilateral decision taken by a handful of people was justified by the importance of saving people. Like many decisions in this crisis, the justifications aren't valid.

In the next few lines, you will understand the real heist that is going on right now, why people will never be free until they take control of their currency, and how AnypsoCoin was created.

## The destruction of the middle class

From the United States to France via Brazil, the situation is always the same:

- A minority have seen their fortunes increase exponentially, reaching record highs.
- A majority have seen their nest egg drop drastically, and their purchasing power shrink catastrophically.

In the context of a pandemic, with travel restrictions, lockdowns, closures, here is what happened:

---

**2,755 billionaires**  
saw their cumulative wealth increase by  
**3.6 trillion euros.**

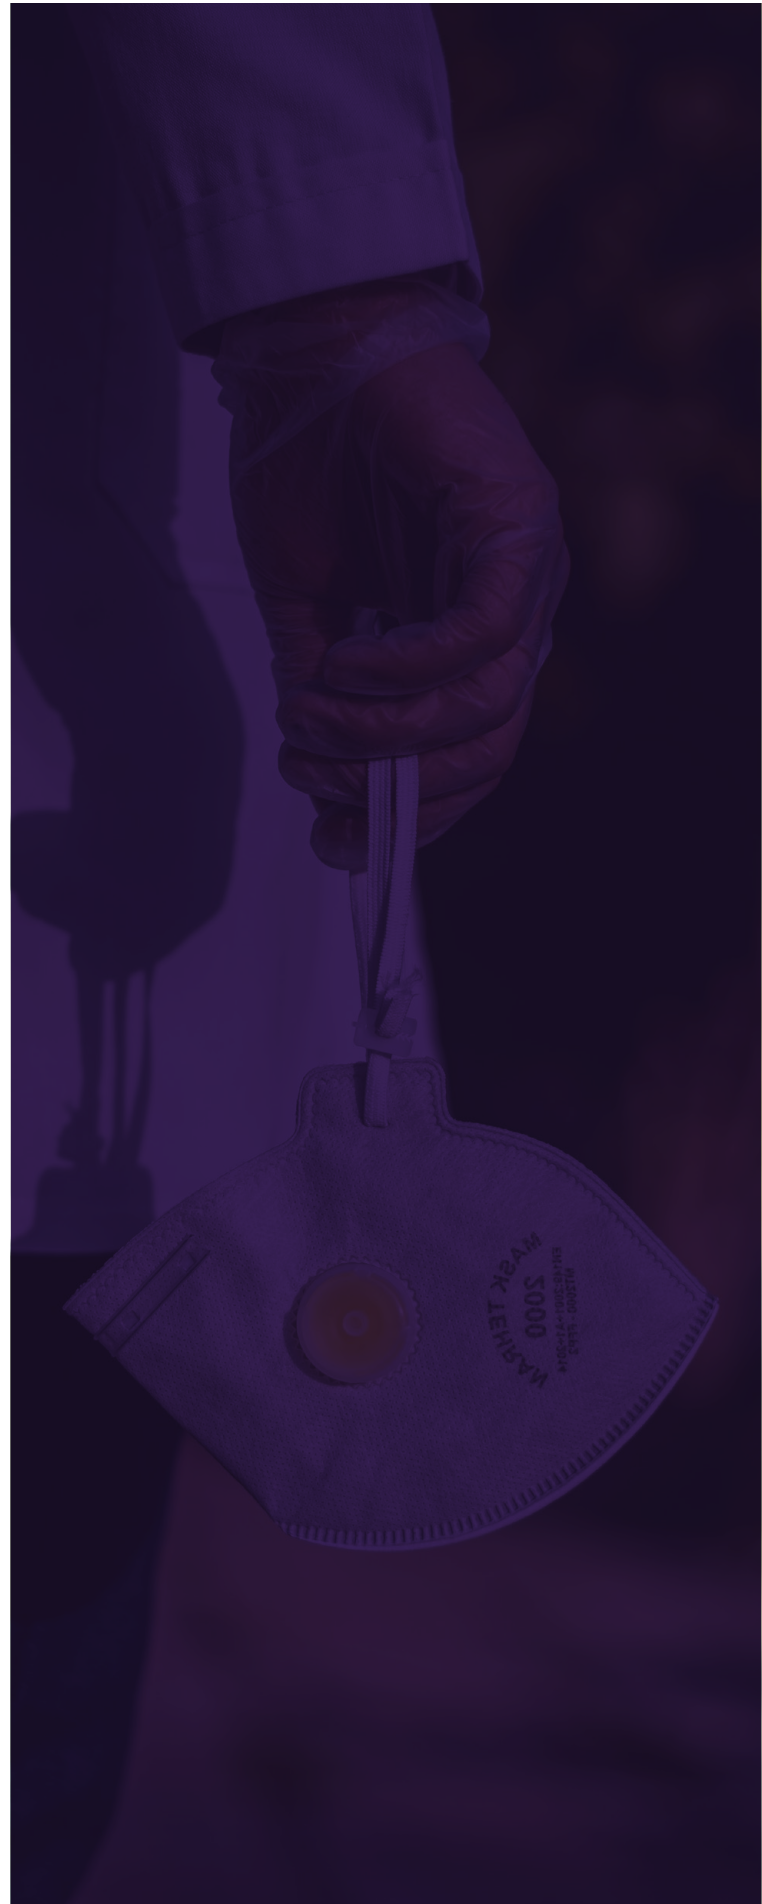

---

**One hundred million people**  
have gone from low income to poverty.

---

Is this normal?

**No.**

# HOW CAN YOU BE IN CONTROL OF YOUR LIFE... IF YOU ARE NOT IN CONTROL OF YOUR MONEY?

**For decades, self-help has helped hundreds of millions of people take control of their lives.**

The principles of self-help have turned victims into winners, they have made it possible to give meaning, to transform miserable lives into true works of art.

**If you are reading these lines, you have done self-help work.**

You have experienced this revelation, when we feel like everything is out of our control, that we are suffering in life... until the moment when the trend is reversed, when we take control...

You've experienced this pride, this emotion of gratitude as you reach your goals, and make your life (and that of your loved ones) better.

**We have bad news. Everything you did. Everything we did. EVERYTHING is being destroyed.**

This is simply because, even if you have regained control of your diet, your health, your work... until you control the flow of money, you will be at the mercy of a handful of people.

## How money printing is a poisoned gift

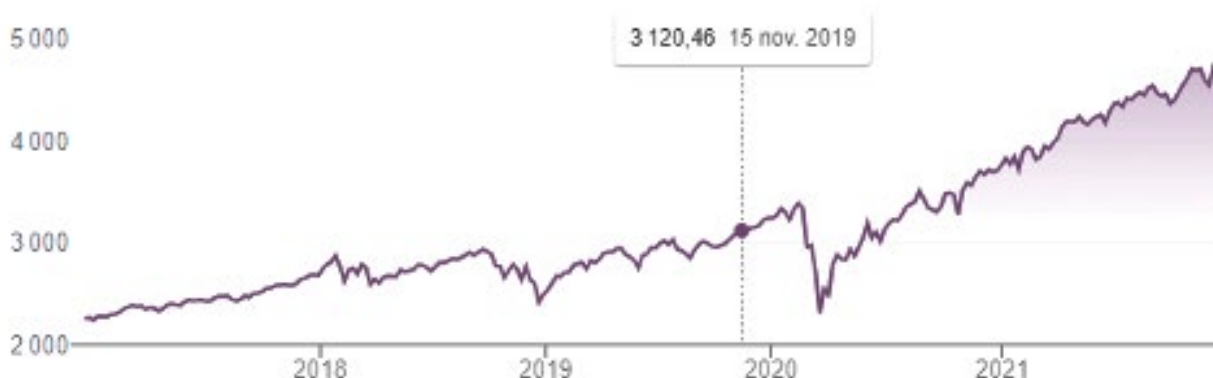

When governments justify printing money, they say it is a gift, that it is to keep you going.

**It's a poisoned gift.**

Some governments wrote a few miserable checks for \$1,200. They took on the air of heroes, great rescuers in the service of people...

It was just a distraction. A crumb to entertain the crowds, as most of the printed money was diverted to another location...

Guess where...

Markets have never been higher than during a pandemic, when economic activity was reduced to a minimum.

# WHY IS IT A POISONED GIFT?

---

**Imagine for a moment that the whole world is sharing only \$1,000 and an apple costs \$1. If a government comes along and injects another \$1,000 into the world economy, will the price of the apple stay the same?**

Maybe. But generally, no. The supplier can imagine that the change is worth less. So it will increase the price of the apple to \$2.

If the majority have a job, wages follow and ultimately inflation will not be a major problem. On the other hand, what happens in the context of a pandemic?

The world shares \$1,000. The government comes in and injects another \$1,000. For anyone with a fortune in stocks in the markets, no problem. The price of shares goes up, fortune follows.

**If the price of an apple goes from \$1 to \$2, they don't even notice it.**

What about the hundreds of millions who no longer have the right to work? Whose companies are making a living? Whose domino effect reduces the number of customers?

**Their savings cannot keep up.**

And progressively, they will be forced to sell the few assets they had just to be able to survive... before finding themselves slaves to an elite.

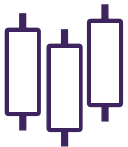

# YOU WILL FIND TRUE FREEDOM ONLY WITH CONTROL OF YOUR CURRENCY.

The heist we are going through is clear. You can follow all the principles of self-help.

You can give maximum value to the market, do a better job than everyone else... But, if you don't control your currency, the game is over.

A minority is in control and can destroy you. It has several levers of destruction:

## MONETARY INJECTION

Triggers inflation as we live now, which favours only those who own stocks in the markets.

## ABSURD LAWS

If we can deny entry to a restaurant to all unvaccinated people who do not show a QR Code (as is the case in Europe), what lies ahead in the future?

## BLOCKING PAYMENTS

The terms of service of payment processors like PayPal or Stripe, and those of banks have continued to strengthen, how far will they go?

In short.

As long as we continue to use the dollar or the euro on a daily basis, we will be at the mercy of an elite.

Money is an integral part of our lives. It is the tool that allows us to be free and to change the world.

Money is too serious to be left to the bankers. **This is the reason why we created AnypsoCoin.**

# ANYPSOCOIN®: THE NEW GENERATION OF CRYPTOCURRENCY

---

**Over the past two years, cryptocurrencies have been accepted by society.**

They are no longer relegated to scams, or geek games. They have become speculative tools even adopted by mainstream companies.

**After all, cryptocurrencies have some incredible advantages:**

## 1 DECENTRALIZATION

Cryptocurrencies run on computer networks that can be managed by anyone. This is what makes them extremely resilient, since these are not companies with limited means and under pressure from governments... but from a community.

## 2 TRANSPARENCY

The computer codes that govern transfers between users are open to everyone. Anyone with computer skills can go and check how the code works, and certify what's going on there.

## 3 FREEDOM

With decentralization and transparency, anyone can use cryptocurrency without fear of having their bank account frozen, or their payment processor stop serving them.

These three advantages change everything. But all is not rosy.

**Despite these three advantages, the problem is that cryptocurrencies are impossible to use in the real world for two reasons:**

- **TRANSACTION FEES** - Transaction fees vary daily, and can reach ridiculously high amounts.
- **PAYMENT TIME** - Payment times also vary, and can take several hours or even days to be validated.

**There are now new generation cryptocurrencies including...**

- Transaction fees that are less than 1% of the sum.
- Payment in seconds.

**The AnypsoCoin® is one of them.**

## The economics of AnypsoCoin®

### Unlike other cryptocurrencies, AnypsoCoin® is in limited supply.

The maximum quantity of AnypsoCoin® will be **465,181,000** at the end of 2027 with an annual gradual deployment. At startup, **8,777,000** AYS were generated. Then, at each winter solstice until 2027, a number of AnypsoCoin® will be released in connection with the Fibonacci sequence. It will be distributed to each owner of AnypsoCoin® in proportion to the number of coins they own.

### Powered by Polygon

The AnypsoCoin® is powered on the Polygon blockchain, which allows it to be fast and secure.

# ANYPSCOIN®: THE FIRST STEP TOWARDS A TRULY FREE WORLD

## The AnypsoCoin® is aimed first at community adoption of self-help and spirituality, by people who truly want to be in control of their lives... and not remain dependent on a greedy elite.

That's why we want to go beyond money... to create AnyVers®. The AnyVers is a virtual universe in service of people, a platform to get out of the system and get organized. Each coach, self-help practitioner, and therapist has their place in it.

#### Whether you are in...

- Traditional alternative medicine / Botanicals
